# Clinical Trials 101 Workshop

*A workshop that will make clinical research your best friend*

## PROGRAMME

8:30 am           **Registration**

9:00 am           **Invocation**

9:10 am           **Opening Remarks**

9:15 am – 12:00nn    **Clinical Trials 101 (Part 1)**

1. The making of a good paper: What are the judges/editors looking for?
  - o The SPIRIT and CONSORT checklists: why they matter
2. Sample size computation decoded and demystified
  - o Examples will be given in the context of your specialty/subspecialty/field
3. Basic statistics for the faint-of-heart: real-time computation of central measures, treatment effects, p-values and confidence intervals
  - o Focus on t-tests (paired and unpaired) and Chi-squared tests
4. Interpretation of trial results: translating numbers into clinical effects
  - o Examples will be given in the context of your specialty/subspecialty/field

12:00 nn – 1:00pm    **LUNCH**

1:00 pm – 2:50pm    **Clinical Trials 101 (Part 2)**

5. Intention to treat and per protocol analysis in clinical trials
  - o What to do with missing data?
6. Non-inferiority trial vs superiority trials: Where lie the differences?

2:50 pm           Open Forum

3:00 pm           **Closing Remarks**

*Jessica Marie R. Abaño, MD, FPAO  
Vice President, PAO  
Over-all Chair, CCEO*

**Moderator:** *Lee G. Versoza, MD*
